✦ AI Overview

Enterprise HR software for mid-size companies **balances deep, enterprise-grade functionality—like complex payroll, global compliance, and advanced analytics—with the rapid deployability and intuitive interfaces that growing organizations need.** Platforms are selected based on whether they focus on heavy payroll operations, workforce automation, or global team management. PeoplesHR +3

Leading enterprise HR platforms suited for mid-size scaling include:

- **Rippling:** Best for workforce automation and robust third-party system integrations. It uniquely unites HR, IT, and finance operations. PeoplesHR
- **ADP Workforce Now:** Best for multi-state tax and compliance-focused companies.

SEO Fundamentals

The three pillars

Technical · Content · Backlinks

Everything else is a tactic inside one of these three.

Myths to kill fast

- ✗ SEO works instantly → 3–6 months minimum
- ✗ More keywords = better rankings → keyword stuffing hurts you
- ✗ You do it once → it's ongoing, monthly
- ✗ AI killed SEO → AI search runs on the same signals

Title tag & meta description check

Title tag & meta description check

- Executes javascript during crawl jobs
- Gives u 3-5 second window

=> dynamically injected metadata is rendered

LLMs

- Fetch only raw HTML
- Do not execute javascript

=> dynamically injected metadata isn't rendered

Do you own plusai.com/blog/how-to-record-presentations-on-ptx? Get indexing and ranking data from Google.

NOT INDEXED :(

Your search - [site:https://plusai.com/blog/how-to-record-presentations-on-ptx](https://plusai.com/blog/how-to-record-presentations-on-ptx) - did not match any documents.

Suggestions:

- Make sure all words are spelled correctly.
- Try different keywords.
- Try more general keywords.

Are you even indexed?

URL is not on Google

This page is not indexed. Pages that aren't indexed can't be served on Google. See the details below to learn why it wasn't indexed. [Learn more](#)

[VIEW CRAWLED PAGE](#)

Page changed? [REQUEST INDEXING](#)

Page indexing

Page is not indexed: URL is unknown to Google

Are you even indexed?

Type **site:yourdomain.com** into Google.

Pages showing up? Good.

Pages not showing or indexed? We've to start with manually indexing them and watch how long it takes to get indexed.

H1 and page structure

One H1 per page. It should contain your main keyword and match what the page is actually about.

Keywords and Topics

Stop thinking in keywords. Think in topics.

A topic = a cluster of related searches with similar intent.

Example: "best vegan burger" + "vegan burger near me" + "vegan burger recipe" → all live under one content topic, not three separate pages.

This long tail with seed keywords

+ how to app|

- 🔍 how to apply for us visa from germany
- 🔍 how to apply for kindergeld in germany
- 🔍 how to apply for german citizenship
- 🔍 how to apply for residence permit in germany
- 🔍 how to apply for uk visa from germany
- 🔍 how to apply for ausbildung in germany
- 🔍 how to apply concealer
- 🔍 how to apply for permanent residency in germany
- 🔍 how to apply for wohngeld in germany
- 🔍 how to apply for german passport

This long tail with seed keywords

The 4 types of search intent

Informational – "what is GEO"

Navigational – "Ubersuggest login"

Transactional – "buy SEO audit tool"

Commercial – "best SEO agency Stuttgart"

Every keyword you target should map to one of these.

Mismatched intent = wasted content.

Worksheet: Build your topic map

GEO: How AI Decides What to Cite

Traditional SEO vs AI SEO

	Traditional SEO	AI SEO (GEO)
Goal	Rank in organic results	Get cited in AI answers
Signals	Keywords, backlinks, on-page	E-E-A-T, structured data, brand mentions
Format	Keyword-matched	Clear structure, direct answers, FAQ
Metric	Rankings, CTR	Citations, share of voice

Why this isn't a separate skill

LLMs search the web for sources to cite. If you rank well where they're scraping, you show up in the answer.

Voice AI solution for SMEs

If you're looking for a Voice AI solution for SMEs (small and medium-sized enterprises), the best choice depends on your use case:

SME Need	Recommended Solutions	Why
AI receptionist / call answering	Synthflow , Retell AI , Vapi	Fast deployment, natural conversations, appointment booking capabilities. VoiceBooker +1
Service businesses (salons, clinics, trades, HVAC, etc.)	My AI Front Desk , Smith.ai	Designed to answer calls, schedule appointments, and capture leads. CallCow
Custom AI voice agent integrated with CRM	Vapi , Retell AI	Strong APIs and integration flexibility. LeadLock +1

Check your own AI visibility

Ask ChatGPT or Perplexity: "best [your category] in [your city][Country][Sector]"

Are you mentioned? Accurate? Who shows up instead of you?

What makes content citable

Author Name, TLDR at the top, FAQs within the content, Clear H2s and index. One claim per sentence, and if you're claiming you're the best - prove it with public info.

This is the single highest-leverage structural change you can make today.

Writing Sprint

What you're building

We will write 3 pieces right now.

1. A bottom-of-funnel piece (comparison, review, "best X for Y")
2. An FAQ-structured piece (answers 3–5 real questions your audience asks)
3. An off-page-ready post (LinkedIn / Reddit / Quora — written for that platform)

What you're building

The structure checklist

- Author Name,
- TLDR at the top,
- FAQs within the content,
- Clear H2s and index.
- One claim per sentence, and if you're claiming you're the best - prove it with public info.

Best structure - but avoid having numbers in URL

Writer's gut check

Would you actually stop and read this? Does it say something the internet doesn't already have 50 versions of?

Pair review + hot seat

Sit in groups of 3 and review your work

Off-Page & Backlinks

Quality over volume

10 backlinks from real, relevant sites beats 1,000 from junk directories.

Google figured out the volume game years ago.

How to actually get them

Directory submissions (relevant ones only)

Guest posting — write something genuinely useful for someone else's audience

Fill the gap — find where competitors are mentioned and you're not, ask to be included

What NOT to do

Private blog networks, reciprocal link exchanges, paid spam placements

These get you penalized when done in bulk.

Local SEO aside

Local business? Add: Google Business Profile, consistent name/address/phone across every directory, 3 local citations every month.

Analytics, Tools and more

My suggestions;

1. **Reporting - SEOptimer, SEMrush, Google Search Console**
2. **AI Search - Peec AI, Profound, Scriptbee**
3. **Content - Claude**

90-Day Plan

SEO is like our health. You don't run one day and expect to be fit.

Your worksheets are your starting point — the 90-day checklist is what makes it stick.

How can I help?
