

YOUR WEBSITE FEEDBACK

META & SEO

- Meta titles and descriptions are solid — no major issues.
- Blog author is listed as 'Yohn Team' — use a real person's name for E-E-A-T.
- Focus on building topical authority on link management rather than over-linking tactics.

DESIGN & UX

- User-friendly website with clear navigation — well done.
- Knowledge base alongside the blog is a strength — keep both with distinct purposes.
- Product description language could be tighter and more AI-readable.

CONTENT & STRUCTURE

- Blog structure needs improvement: add H2s, a TLDR at top, and FAQ at bottom of each post.
- B2C product competing with Bitly — content strategy should focus on differentiation.

3 CONTENT PIECES TO WRITE NEXT

"Bitly alternatives in 2025: a feature-by-feature comparison"

Captures competitor-aware search traffic — one of the highest-converting content types for SaaS.

"How to build a professional link-in-bio page that converts visitors into followers"

Practical tutorial showcasing Yohn.io in action.

"Why link analytics matter: what your click data tells you about your audience"

Educational post building topical authority on link management.

3 SEO & AEO TIPS FOR YOU

- 1 Use real author names on all blog posts — named authors with LinkedIn profiles build E-E-A-T**
'Yohn Team' gives zero trust signal to Google or AI tools.
- 2 Focus content on differentiation from Bitly: be the definitive answer to 'what's better than Bitly?'**
Competing on Bitly's own keywords is a losing battle; own the alternatives conversation instead.
- 3 Add FAQ schema: 'Is Yohn free?', 'How is Yohn different from Bitly?'**
AI tools pull FAQ content directly into their answers — this is your shortcut to AI citations.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com
Weekly signal in the noise — ideas worth your
attention

imismo.com (only Linktree submitted)

YOUR WEBSITE FEEDBACK

META & SEO

- Linktree has no SEO value — organic traffic must go to a domain you own.
- SEO potential is limited on a portfolio template; the platform needs to change if SEO is a priority.

DESIGN & UX

- Currently appears to be Adobe Portfolio or similar — consider a platform with better SEO compliance.
- Strong portfolio and experience — the design should communicate that credibility more prominently.
- Social links are well placed — keep them.

CONTENT & STRUCTURE

- Lead with your specialism, not just a portfolio grid.
- Reference whatevermattersnewsletter.com for expertise-led personal brand communication.

3 CONTENT PIECES TO WRITE NEXT

"My creative process: how I approach [your specialty] projects"

Authority-building personal brand post that shows how you think, not just what you make.

"What to look for when hiring a [your specialty]: a client's guide"

Positions you as the expert, captures hiring-intent search from potential clients.

"Behind the brief: case study on [specific project]"

Detailed case study that showcases process and measurable results.

3 SEO & AEO TIPS FOR YOU

1 Move from Linktree to a proper website — Linktree passes zero SEO value

Every organic visitor should land on a domain you control and can optimise.

2 Write a bio page stating your speciality, location, and 2–3 signature projects

This is the content AI tools read to understand who you are and what you do.

3 List your name on Behance, your industry association, and professional directories

AI tools cross-reference multiple sources to verify expertise — be findable in all of them.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Website communicates its purpose clearly — good foundation to build on.
- Testimonials must be in text format (not images or non-selectable widgets) to be crawlable.
- Blog section needs a full redesign — structure and readability are the priorities.

DESIGN & UX

- Homepage images need replacing — current ones don't match the quality of the service.
- WordPress template looks dated — consider migrating to Framer.
- Appointment booking has too many steps — streamline with a separate section per service.

CONTENT & STRUCTURE

- Photos of people you've worked with are great social proof — keep and expand.
- Videos, press mentions, and podcasts are excellent for authority building and AI visibility.
- About Me section is well done — keep it.

3 CONTENT PIECES TO WRITE NEXT

"Wie Gastronomen mehr Gäste gewinnen: 7 Strategien die wirklich funktionieren"

High-value, shareable content for your exact target audience.

"Restaurant-Coaching: Was ist das und wann brauche ich es?"

Educational post capturing awareness-stage searches from restaurateurs.

"Erfolgsgeschichte: Wie ein Stuttgarter Restaurant seinen Umsatz um X% gesteigert hat"

E-E-A-T case study — the most credibility-building content format.

3 SEO & AEO TIPS FOR YOU

1 Convert image-based testimonials to real text quotes on the page

AI tools and Google can't read text in images; this is costing you credibility signals.

2 Target 'Gastronomie Coaching Stuttgart' and 'Unternehmensberatung Restaurant'

Local + service keyword combinations with clear hiring intent.

3 Build a 'Presse' or 'Media' page: videos, press coverage, podcast appearances

AI tools heavily weight social proof across multiple platforms — make it easy to find.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

STARTING FRESH

- No website yet — that's actually an advantage: you can build it right from the start.
- Choose a platform with clean technical SEO out of the box: Framer, Webflow, or a modern WordPress theme.
- Plan your site structure before building — fixing architecture later is expensive.

3 CONTENT PIECES TO WRITE NEXT

"What I do and who I help: the definitive 'about' page"

Your most important page — it must answer clearly in one sentence: who you are, what you do, who for.

"The problem I solve: an in-depth guide for [your target audience]"

Start with a cornerstone piece of content that explains the core problem your business addresses.

"FAQ: Common questions I get asked about [your topic]"

Write your FAQ page before anything else — it's how AI tools learn to cite you.

3 SEO & AEO TIPS FOR YOU

1 Use Google 'People Also Ask' to find what your audience searches before writing a word

These are the exact questions AI tools are trained to answer — write content that answers them.

2 Register on Google Search Console on day one — it's free and essential

You need to know if Google is indexing your pages; without GSC you're flying blind.

3 Go deep on one content niche rather than broad across many topics

AI tools cite sites they consider authoritative on a specific topic — depth beats breadth.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Meta title is solid and communicates the offering — no major changes needed.
- No blog section — adding one would be the single highest-impact SEO improvement.

DESIGN & UX

- Single-page format is appropriate for this type of agency.
- FAQs on homepage are too many — reduce to 5–6; move extras to dedicated topic pages.
- No pricing or 'How we work' page — a process page adds depth and content.

CONTENT & STRUCTURE

- Reference D1 Growth (d1growth.com) or Hura (hura.com) for agency content benchmarks.
- A blog on marketing and IT topics relevant to your audience drives consistent organic traffic.

3 CONTENT PIECES TO WRITE NEXT

"How to generate more leads for local businesses in Germany: a practical guide"

Captures the exact service intent of your target clients.

"Why most SME websites fail at SEO — and what to do instead"

Thought leadership that attracts your exact buyer and positions you as the expert.

"Digital marketing vs. traditional marketing: what actually works in 2025"

Evergreen content with broad appeal, sharable across channels.

3 SEO & AEO TIPS FOR YOU

1 Add a blog — without it, there is no organic traffic engine for an agency site

Your clients search for answers to marketing questions; be the resource they find.

2 Create a 'How we work' process page — it reduces sales friction and adds a keyword-rich page

Buyers want to know what working with you looks like before they contact you.

3 Reduce FAQs on homepage to 5–6, move topic-specific FAQs to service pages

AI tools surface FAQ answers from the most relevant page; scattered FAQs dilute authority.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Meta title 'Intelligent AI Assistant for SMEs' is specific and strong — good.
- No blog — the most important thing to add for SEO.
- ROI calculator is a great asset — embed it on the homepage as well as the pricing page.

DESIGN & UX

- 'Shaping the future' tagline is generic — replace with something specific to your use case.
- Contact page goes to an address only — add a proper contact form or Calendly link.
- AI assistant banner below the nav could be more prominent.

CONTENT & STRUCTURE

- 'How it works' section is excellent — keep it.
- Move FAQ from standalone page into the pricing page — that's where objections live.
- No blog — SME-focused AI content would be a significant traffic driver.

3 CONTENT PIECES TO WRITE NEXT

"Der KI-Assistent für den Mittelstand: Warum KMUs jetzt handeln müssen"

Urgency-framed post for your exact buyer persona.

"5 Aufgaben, die dein KI-Assistent sofort übernehmen kann"

Practical, shareable content capturing 'KI für Unternehmen' searches.

"ROI von KI: Wie viel spart ein KMU mit einem KI-Assistenten wirklich?"

Pairs perfectly with your homepage ROI calculator.

3 SEO & AEO TIPS FOR YOU

1 Target 'KI Assistent KMU', 'KI für kleine Unternehmen', 'AI Assistant Mittelstand'

These are the exact queries your buyers type into Google and AI tools.

2 Start a blog focused on SME-specific AI use cases

Without content, there is nothing for Google or AI tools to index and cite.

3 Move FAQ into the pricing page

Buyers who reach pricing have specific objections — FAQ there converts better and signals authority.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

GENERAL

- Website was not accessible during the pre-session review — confirm domain is live and correctly configured.
- Run site:valorean.io in Google — if nothing appears, you have an indexing problem to solve first.
- Happy to review in person during the workshop session.

3 CONTENT PIECES TO WRITE NEXT

"What is [your core offering]? A complete guide"

Start with cornerstone content that clearly establishes what you do and why it matters.

"How [your target customer] benefits from [your service]: a practical overview"

ICP-targeted awareness content that speaks directly to your buyer's problem.

"Case study: [measurable outcome] achieved with [your approach]"

Trust and E-E-A-T building from the very beginning — include specific numbers.

3 SEO & AEO TIPS FOR YOU

1 Run site:valorean.io in Google first — if nothing appears, fix indexing before anything else

All content and SEO work is wasted if Google can't see the site.

2 Set up Google Search Console and submit your sitemap on day one

Non-negotiable for any new or recently launched site — you need this data.

3 Write your homepage H1 and meta description before anything else

This is what Google and AI tools use to categorise your site — get it right first.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Site is not optimised for SEO in any meaningful way — this needs to be the starting point.
- No clear meta title or description anywhere on the site.

DESIGN & UX

- The offering is not clearly communicated — a visitor cannot tell what is being sold.
- Full redesign recommended: clear H1, hero section, single focused offering.

CONTENT & STRUCTURE

- Define one specific problem you solve, one audience, one action for visitors to take.
- Consider a template-based approach (Framer or similar) to get a professional baseline fast.

3 CONTENT PIECES TO WRITE NEXT

"Was ist Künstliche Intelligenz? Ein verständlicher Einstieg"

Answers the most Googled AI question in German — cornerstone content.

"Die 10 besten KI-Tools für Einsteiger 2025"

Listicle format that is highly shareable and citable by AI tools.

"KI im Alltag: Wie Menschen ohne Tech-Hintergrund von KI profitieren"

Widens your audience and establishes you as an approachable KI educator.

3 SEO & AEO TIPS FOR YOU

1 Redesign first — without a clear H1, neither Google nor AI tools can understand the site

Your content strategy can't work until it has a clear, crawlable foundation.

2 Target 'KI verstehen', 'Künstliche Intelligenz einfach erklärt'

High-volume, low-competition educational keywords in German.

3 Add a 'KI Glossar' page — glossaries are consistently cited by AI tools as authoritative

Define 30–50 AI terms with clear, plain-German explanations.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets

YOUR WEBSITE FEEDBACK

STARTING FRESH

- No website submitted — the workshop is the perfect starting point.
- Before building anything, define exactly who you serve and what problem you solve.
- Choose a platform with clean technical SEO from the start: Framer or Webflow recommended.

3 CONTENT PIECES TO WRITE NEXT

"What I do and who I help: the definitive 'about' page"

Your most important page — answer in one sentence: who you are, what you do, and for whom.

"The problem I solve: an in-depth guide for [your target audience]"

Cornerstone content that establishes authority on your core topic from day one.

"FAQ: the most common questions I get asked about [your topic]"

FAQ pages are how AI tools learn about you — write this early and update it often.

3 SEO & AEO TIPS FOR YOU

1 Use Google 'People Also Ask' to find what your audience searches before writing a word

These questions are exactly what AI tools are trained to answer — write content for them.

2 Set up Google Search Console on day one — it's free and non-negotiable

You need to know if Google is indexing your pages; without GSC you're flying blind.

3 Go deep on one niche rather than broad across many topics

AI tools cite sites considered authoritative on a specific subject — depth always beats breadth.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Meta titles and descriptions are missing across most pages — top priority fix.
- 'Germany's #1 AI that prepares you for exams on autopilot' is excellent — use it in meta titles.
- Trustpilot reviews: embed as text content, not just a widget — bots can't read widgets.

DESIGN & UX

- Design speaks well to the student audience — colour scheme works.
- Enterprise page quality doesn't match the rest of the site — needs a redesign.
- Resource/blog navigation is confusing — create a clear 'Resources' menu with 'Blog' as subcategory.

CONTENT & STRUCTURE

- Blog articles need better H2 structure and a table of contents on the left side.
- Pricing page is solid but missing an FAQ section — add 4–5 common questions.
- Consider separate pages for major features to increase keyword surface area.

3 CONTENT PIECES TO WRITE NEXT

"How to use AI to prepare for your Abitur — a student's guide"

High-intent, Germany-specific search term with strong seasonal volume.

"The best AI study tools for students in 2025: an honest comparison"

Comparison post capturing 'AI study tool' searches — drives competitor traffic.

"[Subject] exam prep guide: structure, topics, and AI tips"

One post per subject (Mathe, Englisch, Geschichte) = scalable organic traffic.

3 SEO & AEO TIPS FOR YOU

1 Embed Trustpilot reviews as copyable text, not just a widget

AI tools and Google can't read text inside widgets; real text testimonials build trust signals.

2 Create dedicated pages per exam type or subject area

Single-page architecture severely limits your keyword surface area.

3 Add FAQ schema to pricing: 'Is StudyQuick free?', 'How does the AI generate questions?'

These are exactly the questions students ask ChatGPT — FAQ schema gets you cited.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- H1 is too long and doesn't match search intent — refine it to a single clear keyword phrase.
- Inner pages (Lab, About, Workshops) are missing optimised meta titles and meta descriptions.
- Pricing page opens in a new tab — keep it on the main domain to preserve SEO value.

DESIGN & UX

- White text on the animated background is hard to read — add a stronger contrast overlay.
- Lab section has too much unbroken text — break into scannable H2 sections.
- Homepage could be slightly longer to give search bots more content to index.

CONTENT & STRUCTURE

- 'Trusted by teams' section is good social proof — keep it and expand it.
- Product page communicates value clearly — use it as the template for all other pages.
- No blog yet — this is the single highest-impact addition you can make.

3 CONTENT PIECES TO WRITE NEXT

"How AI is changing music production: a creator's perspective"

Positions Muse Machine as the expert voice in AI-assisted creativity.

"From idea to track: building a creative workflow with AI tools"

Practical tutorial that showcases the platform in action.

"AI music generators compared: what to look for in 2025"

Comparison post that ranks for 'best AI music tool' searches.

3 SEO & AEO TIPS FOR YOU

1 Target 'AI music generator' and 'AI music production tool'

High-intent keywords with rapidly growing AI search volume.

2 One keyword-rich H1 per page — fix the long homepage H1 first

The current H1 doesn't match what people search for; a shorter, direct phrase will.

3 Ask ChatGPT: 'What's the best AI music creation platform?' — track your appearance

If you're not cited, add an FAQ answering that exact question with schema markup.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Local SEO should be the primary focus: Google Business Profile, consistent NAP across all directories.
- Meta titles and descriptions need updating across all pages.
- German-first content will outperform English for local search in Stuttgart.

DESIGN & UX

- Website communicates who you are and what you do — solid foundation.
- Social media links are not visible in the footer — add them there, where visitors look.

CONTENT & STRUCTURE

- Blog with recipe content and topics relevant to the German audience would increase organic reach.
- Social media presence is critical for a food business — link it prominently everywhere.

3 CONTENT PIECES TO WRITE NEXT

"Indisches Catering Stuttgart: Was Sie bei der Buchung wissen müssen"

Answers the exact local search intent of your target client.

"Indian food for corporate events: menu ideas and planning guide"

Captures the high-value corporate client segment.

"Vegetarisches und veganes Catering Stuttgart: Indische Küche als Lösung"

Targets the growing vegan/vegetarian event niche.

3 SEO & AEO TIPS FOR YOU

1 Set up and fully optimise your Google Business Profile — this outweighs your website for local search

For a local food business, GBP is where customers find and verify you before calling.

2 Write all primary website content in German

Local search in Stuttgart strongly favours German-language content.

3 Add Instagram and Facebook links to the footer

For a food business, social media is how customers discover and trust you before booking.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your attention

YOUR WEBSITE FEEDBACK

META & SEO

- Meta title 'The #1 ASO Localisation Tool' is strong and communicates clearly.
- Blog exists but is NOT in the nav bar — buried content gets no traffic.
- Meta description could be improved with a stronger value hook.

DESIGN & UX

- Pricing page FAQs are too many (8–10) — reduce to 5 max.
- 'If this is you' section on homepage is useful but shouldn't be a nav item.
- Clean design — could be more polished overall.

CONTENT & STRUCTURE

- Homepage communicates the offering clearly — good.
- Focus next on making blog content discoverable — add to nav under 'Learn' or 'Resources'.

3 CONTENT PIECES TO WRITE NEXT

"How to localise your App Store listing for the German market: a step-by-step guide"

High-intent, market-specific guide — replicate for every country you support.

"ASO vs. SEO: what's the difference and why app developers need both"

Educational post targeting developers new to ASO — top of funnel.

"App Store Optimization by country: what changes and what stays the same"

Scalable format — one post per country = multiple organic landing pages.

3 SEO & AEO TIPS FOR YOU

1 Add the blog to your main navigation under 'Learn' or 'Resources'

Buried content gets zero traffic — visibility in the nav is the single fastest fix.

2 Target long-tail ASO keywords: 'ASO localisation tool', 'localize app store listing'

These are high-intent, low-competition phrases where you can rank quickly.

3 Add SoftwareApplication schema to your homepage

This helps AI tools categorise your product correctly in 'best ASO tools' responses.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Meta title doesn't communicate the offering clearly — rewrite it.
- Single-page structure limits SEO depth — separate pages per service area would significantly help.
- AI crawlers won't understand what this business does from the current content.

DESIGN & UX

- Menu bar buttons are not intuitive — review navigation labels.
- When navigating to offer sections, the menu bar disappears — keep nav persistent everywhere.
- Add LinkedIn and social media links throughout.

CONTENT & STRUCTURE

- Project section should be a dedicated page with detailed case studies.
- Blog section is essential — without it there's no vehicle for ongoing organic traffic.
- Content is understandable when read — but AI needs clearer structure to get there.

3 CONTENT PIECES TO WRITE NEXT

"Digitalisierung im Handwerk: Der praktische Einstiegsleitfaden"

The definitive guide for your exact audience — establishes topical authority immediately.

"Die 5 besten digitalen Tools für Handwerksbetriebe 2025"

Tool recommendation post that is shareable and can earn backlinks from tool vendors.

"Fallstudie: Wie ein Handwerksbetrieb mit digitalen Tools 8h/Woche einspart"

Concrete ROI case study — the most persuasive content format for B2B buyers.

3 SEO & AEO TIPS FOR YOU

1 Create separate pages per service area: /digitale-werkzeuge, /prozessoptimierung, etc.

Single-page sites severely limit how many keywords you can rank for.

2 Fix navigation to be persistent across all pages — search bots follow the same paths as users

A disappearing nav is both a UX problem and a crawlability problem.

3 Target 'Digitalisierung Handwerk' and 'digitale Tools Handwerksbetrieb'

These are underserved keywords where quality content can rank quickly.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Homepage H1 'Automate and Grow' is weaker than the offer page title — swap to lead with the stronger hook.
- Consider 'AI Automation for Real Estate Agents' as H1 — immediately communicates who it's for.
- Blog and breadcrumbs are solid — one of the better implementations in the group.

DESIGN & UX

- Offer page design is better than the homepage — the hierarchy needs reversing.
- Content in offer pages is too dense — use bullet points and shorter sections.
- Appears vibe-coded — a more intentional design pass would help.

CONTENT & STRUCTURE

- FAQ sections exist — good; ensure they're present on every service page.
- Blog structure is solid and is a strength — now build topical authority with volume.
- Breadcrumbs are a great touch for both UX and SEO.

3 CONTENT PIECES TO WRITE NEXT

"KI-Automatisierung für Immobilienmakler: Welche Aufgaben sofort weggegeben werden können"

Specific, high-intent post for your exact audience — answers their first question.

"Wie KI-Makler 10+ Stunden pro Woche sparen: ein praktischer Überblick"

Benefit-focused content that captures research-mode buyers evaluating the ROI.

"Die beste KI-Software für Immobilienmakler 2025: ein ehrlicher Vergleich"

Comparison post intercepting buyers who are actively evaluating options.

3 SEO & AEO TIPS FOR YOU

1 Change homepage H1 to 'KI-Automatisierung für Immobilienmakler'

Tell Google and AI tools exactly who you serve and what you do — specificity wins.

2 Add specific ROI numbers to case studies: '12h/week saved' beats 'significant time saved'

AI tools cite specific, verifiable claims — vague language gets skipped.

3 Publish 10+ posts on AI + real estate to build topical authority

AI tools and Google promote sites they consider the authoritative voice on a specific topic.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Meta title 'Business Coaching for Clever People' is readable but not keyword-optimised.
- Blog section is entirely missing — the biggest SEO gap for a coaching business.
- Content reads as AI-written (heavy em-dash use) — rewrite in a more personal voice.

DESIGN & UX

- WordPress site — consider Framer for better design flexibility and page speed.
- Homepage needs real photos of people — coaching is a human service.
- Reference whatevermattersnewsletter.com as a design and voice benchmark.

CONTENT & STRUCTURE

- About Me section is solid — keep it exactly as is.
- 'Let's Connect' → Calendly is a good conversion path; keep it prominent.
- A blog would be transformative for organic traffic — even 1 post/month compounds.

3 CONTENT PIECES TO WRITE NEXT

"What is business coaching and who needs it?"

Definitive answer to a high-volume question — captures top-of-funnel search.

"3 signs your business is ready for a coach"

Awareness-stage content for people not yet searching 'coaching'.

"How business coaching helped [client] grow by 40%: a case study"

E-E-A-T-building story that builds trust and Google credibility.

3 SEO & AEO TIPS FOR YOU

1 Rewrite meta title to include 'Business Coaching [City]'

Coaching is a local and personal service — location matters for search intent.

2 Start a blog: even 1 post per month compounds significantly over 12 months

Without a blog there is no organic traffic engine — this is your #1 priority.

3 Add an FAQ: 'What does a business coach do?' and 'How much does coaching cost?'

AI tools cite FAQ content verbatim — these are the exact questions they answer.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Blog posts have hashtags — remove them; hashtags have zero SEO value on websites.
- Blog structure needs improvement: add TLDR, H2s, and FAQ sections to each post.
- First question to clarify: are people searching for a specific service, or for you by name?

DESIGN & UX

- Portfolio/profile format is fine — ensure it's clear what service or outcome you offer visitors.
- Design communicates authority well overall.

CONTENT & STRUCTURE

- Define clearly what you want website visitors to do: book a call, read your work, or contact you.
- Content strategy should flow directly from your answer to the intent question.

3 CONTENT PIECES TO WRITE NEXT

"Mein Ansatz: Wie ich [specific problem] für [specific audience] löse"

Forces you to articulate your offer clearly — great for both humans and AI discovery.

"Die häufigsten Fehler bei [your specialty topic]: Was ich in X Jahren gelernt habe"

Thought leadership and E-E-A-T-building post that showcases genuine expertise.

"FAQ: Wann sollten Unternehmen einen [your title/role] hinzuziehen?"

Directly answerable by AI tools and reduces sales friction for potential clients.

3 SEO & AEO TIPS FOR YOU

1 Remove hashtags from all blog posts — replace with proper H2 section headers

Hashtags have no SEO value on websites; H2s structure your content for both readers and crawlers.

2 Define one clear call-to-action on every page

Inconsistent CTAs confuse visitors — decide: book, read, or contact, then commit to it.

3 Add Person schema to your homepage with name, expertise, and credentials

AI tools read structured data to verify professional credibility — this is how you get cited by name.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'

Whatever Matters Newsletter

posts.whatevermattersnewsletter.com

Weekly signal in the noise — ideas worth your
attention

YOUR WEBSITE FEEDBACK

META & SEO

- Meta title mentions 'AI platform' — could be more specific to the industry verticals you serve.
- Blog is on a subdomain — not ideal; a subdirectory (/blog) passes more authority to the main domain.
- Blog appears to be on Notion — not recommended for SEO; migrate to a proper CMS.

DESIGN & UX

- Voice AI product shown with a human image creates a disconnect — align visuals with the actual product.
- Industry-specific menu items are a strength — good for driving targeted traffic.
- CTA 'Start AI call / I'll call you back' is powerful — make it the primary CTA instead of 'Get Started'.

CONTENT & STRUCTURE

- FAQs on homepage are good — add them to the pricing page too.
- Blog content is solid, but migration off Notion is the priority.
- H2 titles need adding throughout the site for better structure.

3 CONTENT PIECES TO WRITE NEXT

"How AI phone agents are replacing traditional customer service teams"

Thought leadership targeting decision-makers considering the switch.

"Voice AI for [industry]: how businesses cut response time by 60%"

Industry-specific post — replicate this for each vertical you serve.

"AI vs. human customer service: a 2025 cost comparison"

High-intent content capturing buyers in active research mode.

3 SEO & AEO TIPS FOR YOU

1 Move blog from Notion subdomain to 8labs.ai/blog

A subdomain is a separate site in Google's eyes — you lose all SEO value from your blog content.

2 Add FAQs to the pricing page: 'How much does a voice AI agent cost?', 'How long is setup?'

Buyers ask AI assistants exactly these questions before contacting a vendor.

3 Target industry-specific keywords: 'voice AI for healthcare', 'AI phone agent for e-commerce'

These combinations are high-intent and have far less competition than generic 'AI customer service'.

APPLIES TO EVERYONE IN THE ROOM

- Add or improve meta titles and meta descriptions on every page
- One H1 per page containing the main keyword — matching what the page is about
- Blog section — the highest-leverage addition for organic traffic
- Blog posts need: TLDR at top, clear H2s, FAQ at bottom, real author name
- Testimonials in text format — not images or non-selectable widgets
- Check AI visibility: ask ChatGPT or Perplexity 'best [your category] in [your city]'
